

Presentations in Learners

Category Redirects

- The presentations category has been configured to automatically redirect to this page. You can find and change that in the /presentations/_index.html file.

```
title: Presentations
weight: 3
pre: ""
chapter: true
redirect: "introduction/"
```

Structure

- The markdown data page for each presentation is stored in subfolders under `content/presentations/`
 - E.g. this page is rendered from `/content/presentations/introduction/_index.md`
- Learners will display a defined pdf either from the presentation directory or from `/_slides` if the variable `global_slides` is set to `true`.
 - E.g. the embedded PDF presentation in this slide comes from `/_slides/learners-introduction`.

Presentation Data File

```
---
Title: Learners Introduction
menuTitle: Learners Introduction
weight: 1
chapter: false
slides: "learners-introduction.pdf"
global_slides: true
questionnaire:
  - question: "Here is a question for the questionnaire"
    answers:
      - "Answer #1"
      - "Answer #2"
      - "Answer #3"
      - "Answer #4"
    multiple: false
---
```

Now let's see how that renders.

Presentations in Action

```
---
Title: Learners Introduction
menuTitle: Learners Introduction
weight: 1
chapter: false
slides: "learners-introduction.pdf"
global_slides: true
questionnaire:
  - question: "Here is a question for the questionnaire"
    answers:
      - "Answer #1"
      - "Answer #2"
      - "Answer #3"
      - "Answer #4"
multiple: false
---
```

The screenshot shows a web browser window with the URL <https://learners/#presentations>. The page is titled "Presentations" and displays a slide titled "Learners Introduction". The slide content is as follows:

Structure

- The markdown data page for each presentation is stored in subfolders under `content/presentations/`
 - E.g. this page is rendered from `/content/presentations/introduction/_index.md`
- Learners will display a defined pdf either from the presentation directory or from `/_slides` if the variable `global_slides` is set to `true`.
 - E.g. the embedded PDF presentation in this slide comes from `/_slides/learners-introduction`.

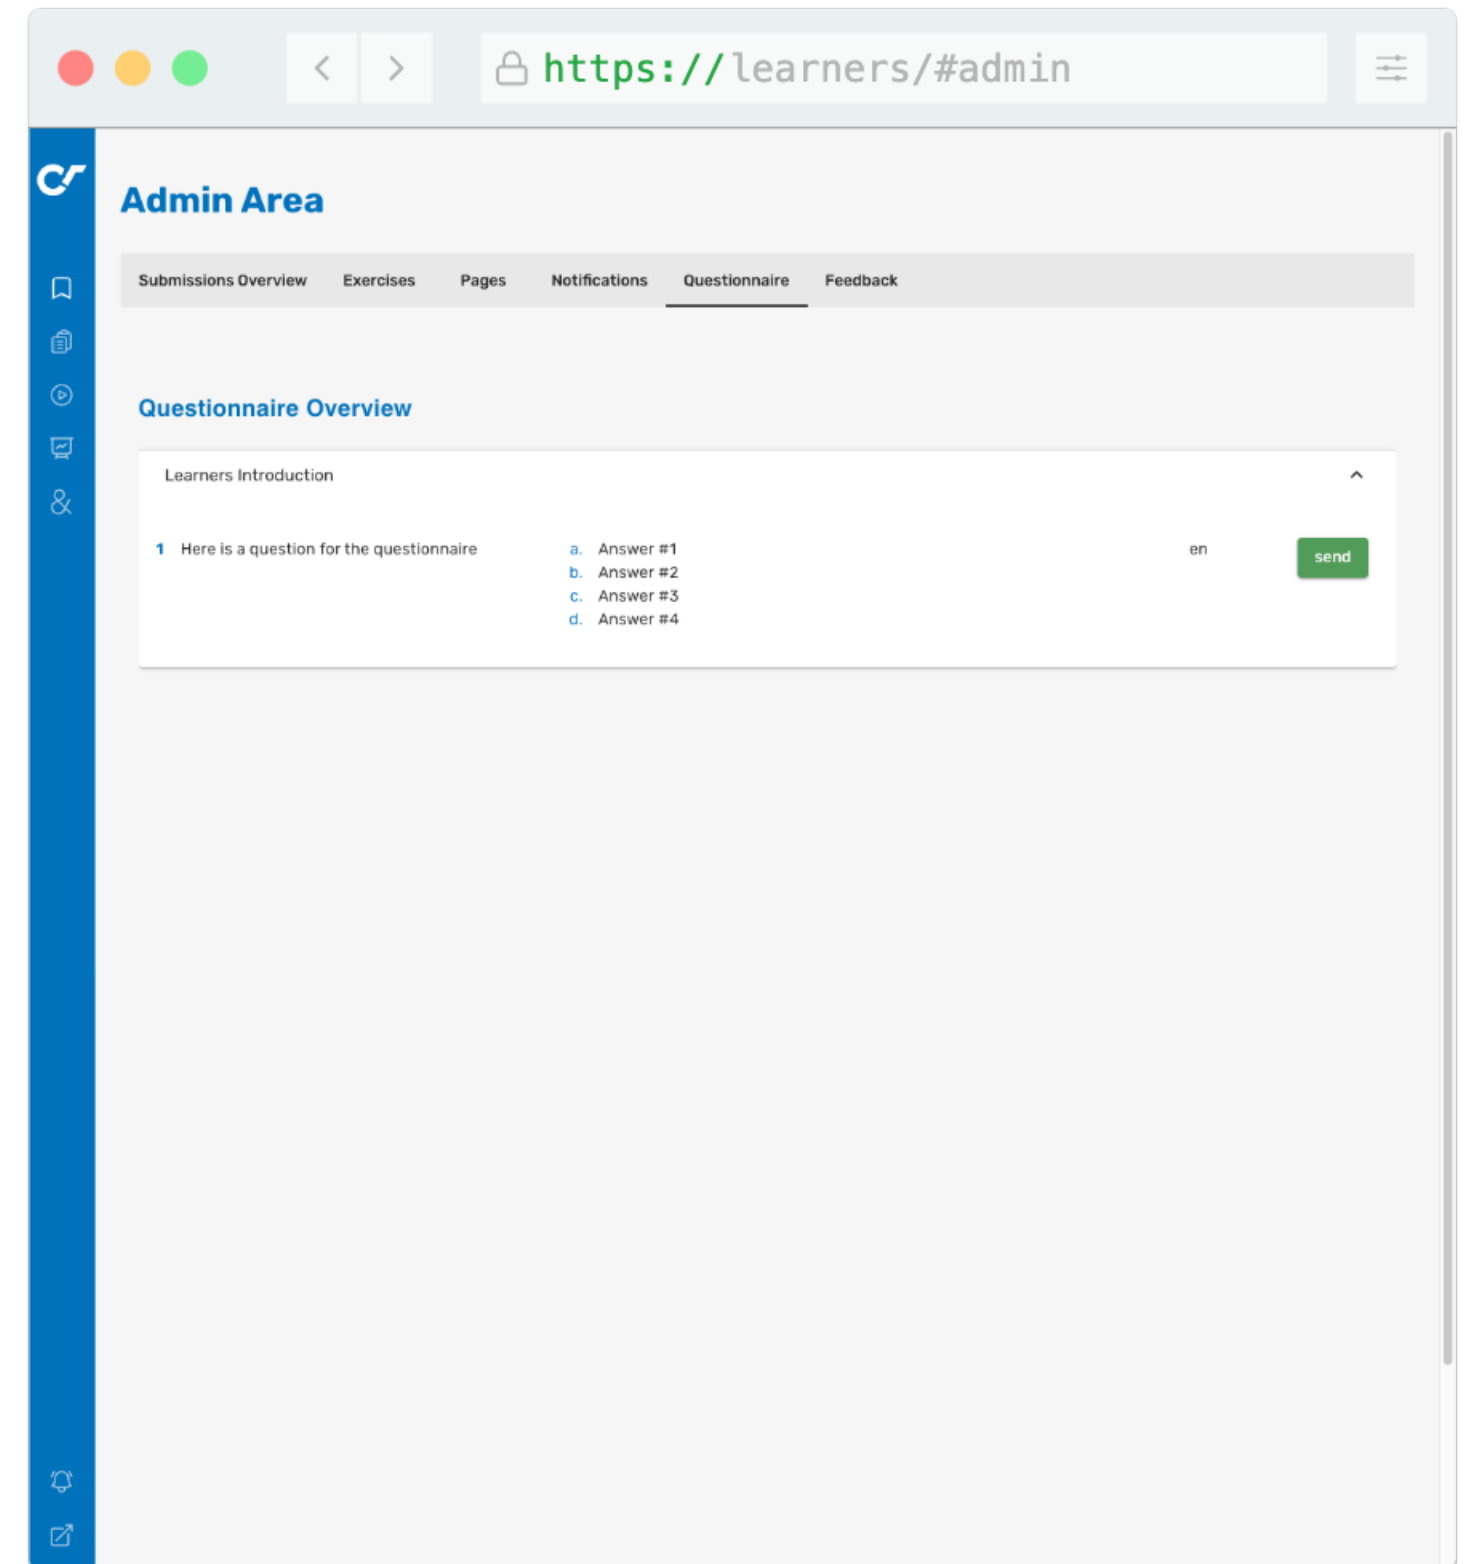

Presentation Data File

```
---
Title: Learners Introduction
menuTitle: Learners Introduction
weight: 1
chapter: false
slides: "learners-introduction.pdf"
global_slides: true
questionnaire:
  - question: "Here is a question for the questionnaire"
    answers:
      - "Answer #1"
      - "Answer #2"
      - "Answer #3"
      - "Answer #4"
multiple: false
---
```

Now let's see how that renders.

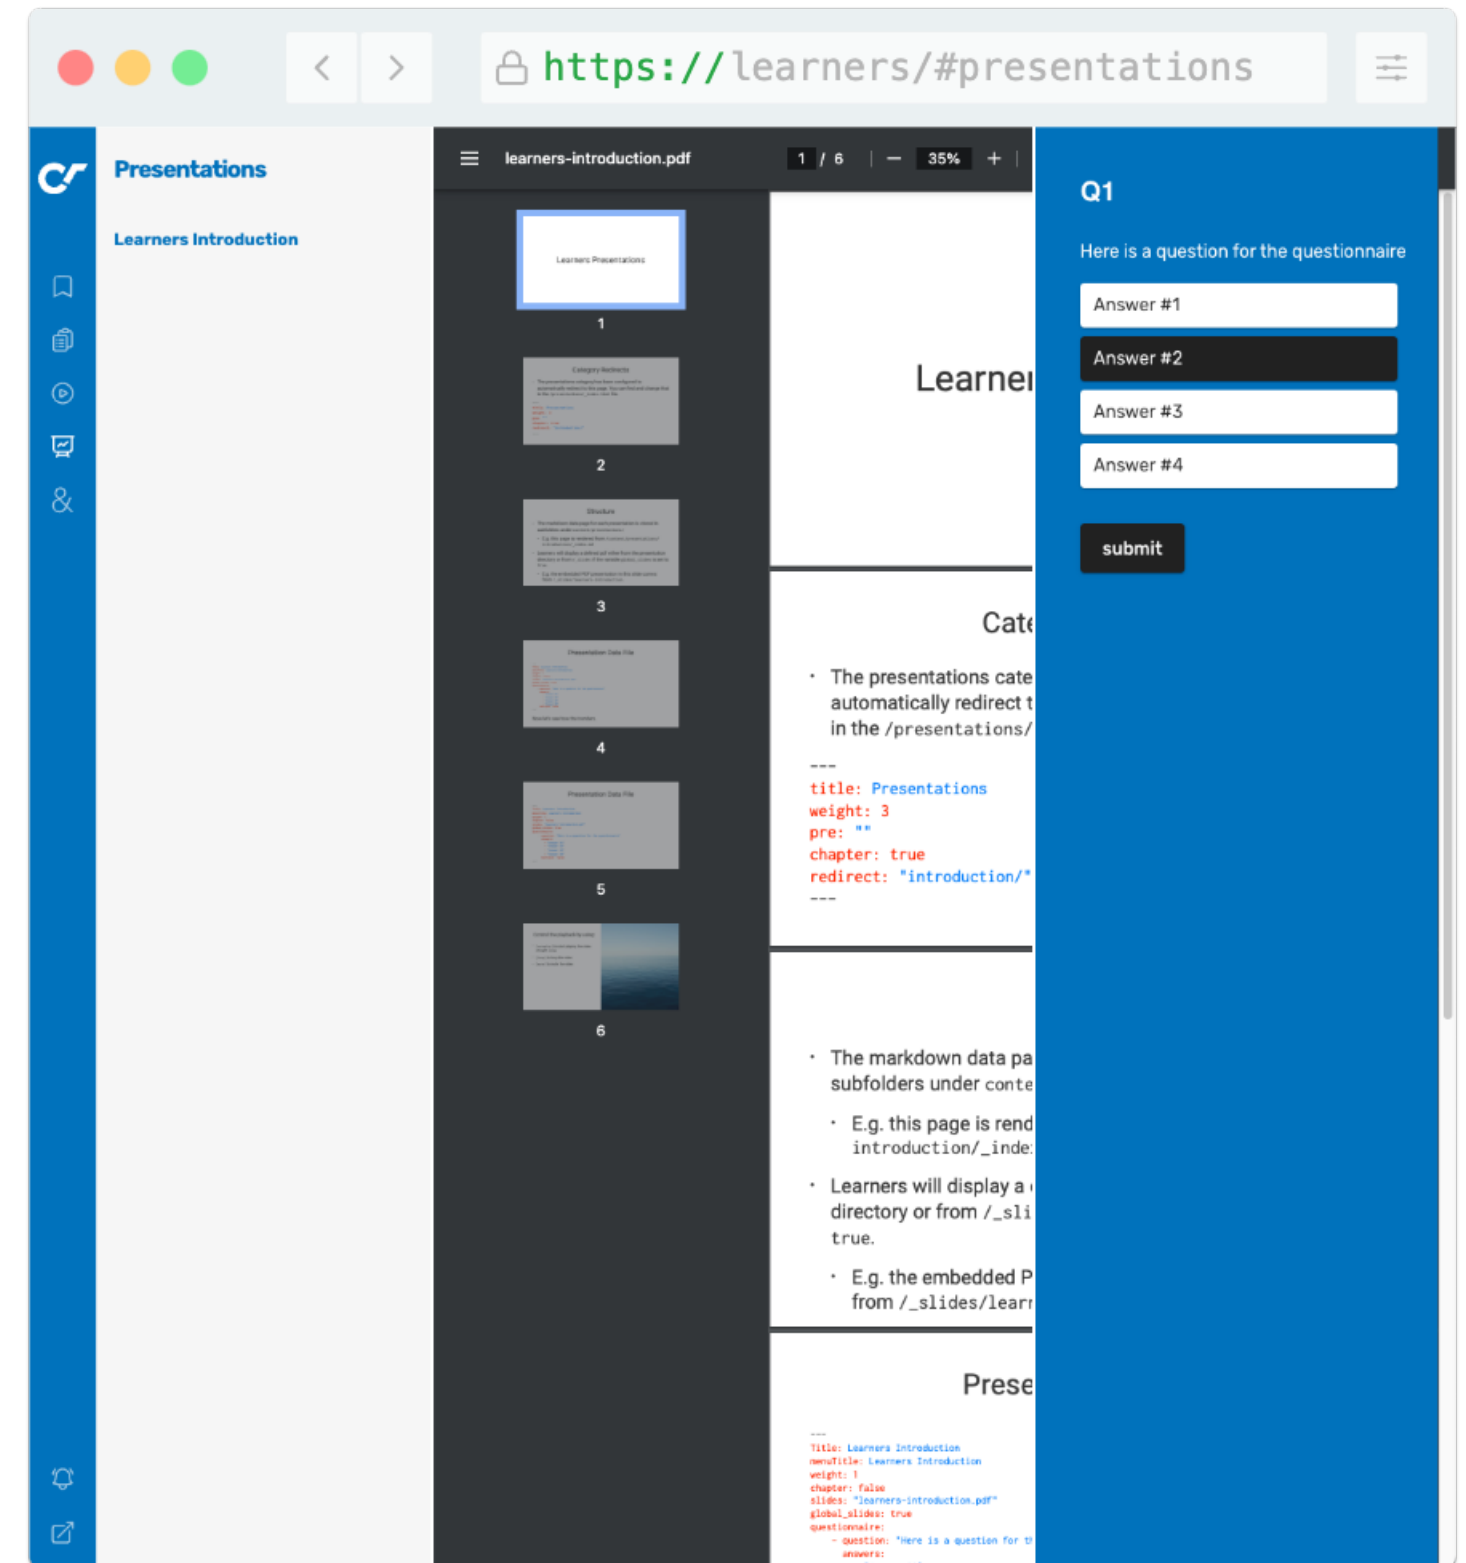

Questionnaire / Quiz Admin

- Noticed the pre-defined questions? An admin can deploy them to participants during the presentation from the admin view.
- Note: Quiz questions are not deployed automatically.
- This is what the admin will see:

Questionnaire / Quiz User

- ...and this is what the user will see. On submission the responses will show up on the admin view and can be shown to the class to enable discussion.
- Let's submit something and see the pie chart of responses the admin can now display.

Questionnaire / Quiz Responses
